Sequence 2, Application US/09822871
Patent No. 6723547
GENERAL INFORMATION:
APPLICANT: WEBSTER, Marion et al
TITLE OF INVENTION: ISOLATED HUMAN PHOSPHATASE PROTEINS,
TITLE OF INVENTION: NUCLEIC ACID MOLECULES ENCODING HUMAN PHOSPHATASE PROTEINS,

RESULT 10 US-09-822-871-2

Published_Applications Nucleic Acid and Published_Applications Amino Acid database searches now generate two sets of results each. The Published_Applications databases have been split into two parts to reduce the amount of time required for their daily updates. This results in more machine time being available for processing searches.

Newly published applications will appear in the Published Applications make up the Published Applications make up the Published Applications and Applications applications make up the Published Applications and Applications and Applications and Applications and Applications and Applications and Applications are applications and Applications and Applications and Applications are applications and Applications and Applications and Applications and Applications and Applications and Applications and Applications and Applications and Applications and Applications are applications and Applications and

Searches run against Nucleic Acid Published_Applications produce two sets of results, with the extensions frapbm (Published_Applications_NA_New).

Searches run against Amino Acid Published_Applications produce two sets of results, with the extensions

rapbm (Published_Applications_AA_Main) and .rapbn (Published_Applications_AA_New).

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                1 MLSHGAGLALWITLSLLQTG.......FPIYENVNPEYHRDPVYSRH 1997
